

Om Patil

Address: 376 Santa Louisa, Irvine 92606, USA **Phone number:** +15306365748 **Email address:** patilom2114@gmail.com
Portfolio: <https://www.patilom2114.com/> **Linkedin:** <https://www.linkedin.com/in/patilom2114/>

Profile

Innovative Senior Software Engineer and Integration Engineer with over 8 years in Engineering, excelling in event-driven architecture and scalable API development. Led automation of website migrations, reducing costs per year and increasing deployment velocity. Skilled in Java, Spring Boot, AWS, and PostgreSQL. Provides end-to-end product ownership and integration expertise to optimize enterprise software solutions and drive efficiency.

Work Experience

Senior Software Engineer Tenant

📅 10/2025 – present 📍 Irvine, CA, U.S.A.

Tech: Java, Spring Boot, PostgreSQL, AWS S3, Event-Driven Architecture, Webhooks, REST APIs, API Gateway, Microservices, Integrations

- **Designed and built a fully automated Website Migration Platform** that migrated websites, content, assets, configurations, and metadata with minimal manual intervention.
- Architected migration pipelines using **AWS S3, PostgreSQL**, REST APIs, and distributed processing workflows to ensure reliability and scalability.
- Served as **Product Owner, Software Architect, Developer, QA, and DevOps Engineer**, owning the entire product lifecycle from requirements gathering to production deployment.
- Promoted to the **Nectar Integrations Team** for delivering high-impact engineering solutions across multiple business units.
- Partner directly with enterprise customers and integration providers to troubleshoot production issues and design scalable integration solutions.
- Support and enhance a platform processing millions of events annually across multiple enterprise integrations.

Key Skills: Product Ownership, System Design, Event-Driven Architecture, API Development, PostgreSQL, AWS, SaaS Platforms, Integration Engineering.

Founder & Developer Surge Aina

📅 01/2025 – 10/2026 📍 San Jose, CA, U.S.A.

Tech: React, Node.js, MongoDB, AWS, Vercel, Render, Product Management, Growth Strategy

- **Founded and built FindVirtual.me**, an AI-powered website and portfolio platform competing with Wix, GoDaddy, Squarespace, and traditional website builders.
- Led complete product strategy, customer discovery, engineering, branding, pricing, marketing, and go-to-market execution.
- Conducted extensive customer interviews and feedback sessions to validate features and improve user adoption.
- Designed a platform capable of generating professional digital portfolios and business websites in seconds.
- Built scalable frontend and backend systems supporting dynamic content generation and customizable user experiences.
- Managed a distributed team of developers, designers, and marketing contributors across multiple projects.
- Defined product roadmaps, growth initiatives, and monetization strategies while maintaining technical ownership.
- Implemented analytics and customer feedback loops to drive product decisions through data rather than assumptions.
- Created scalable SaaS infrastructure capable of supporting thousands of users while maintaining low operational costs.

Key Skills: Startup Leadership, Product Management, SaaS Development, Customer Discovery, Growth Strategy, Full Stack Development.

Work Experience

Software Engineer

Chico State Enterprises

📅 05/2024 – 12/2024 📍 Chico, CA, U.S.A.

Tech: OpenCV, CUDA, Python, MATLAB, Machine Learning, Computer Vision, Data Analytics

- **Led development of a machine-learning-driven infrastructure assessment platform for civil engineering applications.**
- **Built computer vision systems capable of identifying roadway cracks, potholes, surface deterioration, and structural defects.**
- **Applied Structure-from-Motion (SfM)** and feature detection algorithms including SURF to generate 3D reconstructions from image datasets.
- Developed software that estimated repair costs and maintenance priorities using image-based infrastructure analysis.
- Managed student researchers and coordinated technical deliverables across multiple project work streams.
- Utilized GPU acceleration and CUDA-based processing pipelines to improve image processing performance.
- Delivered actionable insights and cost recommendations to engineering stakeholders and government agencies.

Key Skills: Computer Vision, Machine Learning, OpenCV, CUDA, Python, MATLAB, Technical Leadership.

Software Engineering Intern

7QUBES

📅 05/2023 – 08/2023 📍 Chicago, IL, U.S.A.

Tech: React, OpenAI APIs, Chrome Extensions, JavaScript, REST APIs

- **Developed an AI-powered Chrome Extension that transformed one-time prompts into reusable organizational knowledge assets.**
- **Integrated OpenAI APIs to enhance prompt quality, consistency, and response effectiveness across teams.**
- **Designed a prompt management framework allowing users to save, version, reuse, and continuously improve prompts.**
- **Reduced repetitive prompt engineering efforts while increasing adoption of AI tools within internal workflows.**
- **Built frontend and backend integrations supporting seamless prompt retrieval and management.**
- **Collaborated with engineering teams to deploy AI-powered productivity tools into daily operations.**

Key Skills: OpenAI APIs, Chrome Extensions, React, Prompt Engineering, Productivity Systems.

Founder & Managing Director

Siddhi Innovations

📅 01/2022 – 08/2026 📍 Nashik, India

Tech: Business Operations, Sales, Negotiation, Vendor Management, Project Management

- **Founded and scaled a construction equipment and ready-mix concrete operations business from the ground up.**
- **Identified, negotiated, and acquired industrial assets valued at approximately \$30,000+.**
- Built relationships with contractors, suppliers, transportation partners, and government stakeholders.
- Managed end-to-end operations including sales, logistics, finance, procurement, and customer acquisition.
- Grew the business to over **\$3,000+ monthly profit** within months of launch.
- Successfully exited the business through a profitable acquisition, generating approximately **163% ROI**.
- Led hiring, operational planning, and contract negotiations across multiple active projects.

Key Skills: Entrepreneurship, Negotiation, Operations Management, Financial Planning, Business Development.

Software Developer

Extentia Information Technology

📅 08/2021 – 01/2022 📍 Pune, MH, India

Tech: Angular, TypeScript, Drupal, JavaScript, HTML, CSS

- **Developed enterprise-scale Angular applications supporting multi-tenant and white-label deployment models.**
- **Contributed to platforms serving databases containing 10M+ user records.**
- Built reusable UI components and front-end modules improving development efficiency across multiple projects.
- Collaborated with a global engineering team of **50+ developers** to modernize Drupal-based platforms.
- Enhanced multilingual capabilities and internationalization support for customer-facing applications.
- Participated in Agile ceremonies, sprint planning, code reviews, and client requirement analysis.
- Authored onboarding documentation and development guides to improve team productivity.

Work Experience

Key Skills: Angular, TypeScript, Enterprise Applications, Multi-Tenant Systems, Agile Development.

Product Engineer Intern

S.M.P. Industries and consulting

📅 08/2020 – 07/2021 📍 Nashik, MH, India

Tech: Manufacturing Operations, Product Development, Supply Chain, Industrial Engineering

- **Worked directly with manufacturing leadership to understand large-scale industrial operations, accounting, procurement, and production management.**
- **Designed and launched a new product assembly line during the COVID-19 pandemic with no prior manufacturing experience.**
- **Built a 13-stage production workflow for sanitizer dispensing components supplied to major international customers.**
- **Coordinated suppliers, labor, logistics, procurement, and quality assurance processes.**
- **Delivered products to large-scale customers including organizations within the U.S. sanitation supply chain.**
- **Gained hands-on experience across engineering, manufacturing, finance, operations, and business management functions.**

Key Skills: Manufacturing Engineering, Operations Management, Supply Chain, Product Development.

Education

Computer Science | Master's of Science

California State University, Chico

📅 08/2022 – 12/2024 📍 Chico, United States

- Conducted research in **Computer Vision and Machine Learning**, applying image processing and 3D reconstruction techniques to real-world infrastructure assessment projects.
- Explored **CUDA-based parallel computing** and GPU acceleration techniques for high-performance image processing and machine learning workloads.
- Designed and deployed cloud-native applications utilizing **AWS S3**, distributed architectures, CI/CD pipelines, and modern deployment workflows.
- Studied **Microservices Architecture**, API-driven systems, scalability patterns, and distributed application design.
- Researched **Human-Computer Interaction (HCI)** principles with a focus on immersive computing and user experience design in spatial environments.
- Investigated usability and interaction patterns for **Apple Vision Pro** and next-generation mixed reality ecosystems.
- Developed a mixed-reality application using the **Apple VisionOS ecosystem**, gaining hands-on experience in spatial computing and immersive user interface design.
- Participated in multidisciplinary research combining software engineering, computer vision, and real-world engineering applications.

Computer Engineering | Bachelor of Technology

Vishwakarma Institute Of Technology

📅 08/2018 – 06/2022 📍 Pune, India

- Active member of the Institute of Electrical and Electronics Engineers (IEEE), participating in technical workshops, engineering seminars, and industry-focused events.
- Co-authored a research publication focused on developing a **low-cost automated fire suppression and detection system**, aimed at improving accessibility and affordability of fire safety solutions.
- Participated in multiple software development competitions and hackathons, building solutions under rapid development cycles and collaborative team environments.
- Explored IoT systems, embedded hardware integration, automation technologies, and real-world engineering problem solving.
- Worked on interdisciplinary projects involving software development, electronics, automation, and system design.
- Developed strong foundations in software architecture, algorithms, object-oriented programming, and large-scale application development.

Skills

- LANGUAGES

JavaScript	TypeScript	HTML	CSS
C++	C	C#	Java
TypeScript	Python	Swift	Vue
- TECH			
Spring Boot	AWS S3	PostgreSQL	REST APIs
API Gateway	Microservices	Webhooks	React
Node.js	MongoDB	Vercel	Render
OpenCV	CUDA	Python	MATLAB
Chrome Extensions	Angular	Drupal	HTML
CSS	CI/CD	Distributed Systems	Scalability
Cloud-native Applications	Data Analytics	3D Reconstruction	Parallel Computing
Image Processing	Software Architecture	Object-Oriented Programming	Automation Technologies
System Design	AWS CloudFront	AWS Lambda	AWS Dynamo
- SOFT			
Event-Driven Architecture	Automation	Product Ownership	Integration Engineering
Customer Discovery	Growth Strategy	Machine Learning	Computer Vision
Technical Leadership	Prompt Engineering	Entrepreneurship	Negotiation
Operations Management	Business Development	Agile Development	Manufacturing Engineering
Supply Chain	Project Management	GPU Acceleration	Spatial Computing
